

German for the whole family

Do you know what I mean? A language course can offer you a unique opportunity to thoroughly enjoy your vacation destination and to expand your knowledge of German in the country where it is spoken. Ever since you started a family, you haven't had time for language courses anymore. We have first-hand experience with this special situation. This is why we have developed this special program: German for the whole family!

The parents finally have time to enjoy an intense language class in peace. While the adults are learning German grammar and vocabulary, the children are well looked after. That way the whole family has fun at the language school.

We offer different options. Our German programs are as diverse as life itself:

- Mother-and-child course
- Parent-toddler course
- German for the whole family
- Mini Groups for the parents, a special program for the kids
